Processing Policies	Posting Order The order in which withdrawals and deposits are processed	We start with the account balance in your account at the beginning of the banking day, subtract holds from your account balance and make any adjustments from prior days. Next, we add credits and then subtract debits from your account balance. The following is a summary of how we generally post items and examples of some of our categories and the more common transactions we assign to each category.  • First, your deposits and credits are added to your account balance.  • Then, withdrawals made at our teller windows, transfers made with our 24-Hour Personal Account Line, online and mobile banking systems, online and mobile banking bill payments and outgoing wire transfers are subtracted from your account balance in lowest to highest dollar amount.  • Then, card transactions and ATM transactions are subtracted from your account balance in date and time order.  • Then, ACH debits without a check number are subtracted from your account balance before other checks you wrote with a check number, in highest to lowest dollar amount. When we receive a check number, checks will be subtracted from your account balance in sequential check number order.  • Finally, most fees and service charges in lowest to highest dollar amount.
